PROFILE SUMMARY

I am a MERN stack developer with expertise in JavaScript, React.js, Node.js, Express.js, and MongoDB. I am dedicated to writing clean, maintainable code and continuously enhancing my skill set. Passionate about building modern web applications, I am eager to contribute to innovative projects and collaborate with dynamic teams to gain diverse industry experience.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript.
- **Frontend Technologies:** HTML5, CSS3, React.js, Redux, Tailwind CSS, Next.js.
- **Backend Technologies:** Node.js, Express.js, MongoDB, Mongoose, Multi-tenant Architecture.
- **Deployment:** Vercel, Render.
- **Tools and Libraries:** Git, GitHub, Postman, Multer, Nodemailer, Trello.
- **Integrations:** JWT, React OAuth2 — Google, Cloudinary, Stripe.

PROFESSIONAL EXPERIENCE

INTERN, BRIDGEON SOLUTIONS

Jul 2024 – present

- Developed responsive and user-friendly interfaces using React.js, HTML, CSS, and JavaScript.
- Engaged in Agile development processes, including sprint planning, daily stand-ups, and collaborative teamwork.
- Contributed to projects such as a full-stack project management app using Next.js, ensuring efficient and scalable development.
- Managed version control with Git, performed code reviews, and participated in pair programming to maintain code quality and streamline workflows.

PROJECTS

Booking.com clone, Service-based E-commerce |Github 🏠

- Built a feature-rich travel accommodation platform inspired by Booking.com 🏠, enabling user and partner registration, property listings, bookings, reviews, payments, and admin controls.
- Integrated OTP login, JWT-based authentication, and password reset functionality for both guests and partners, ensuring secure access and data protection.
- Developed a robust booking system with real-time availability, dynamic filters (location, price, type), and saved properties. Enabled partners to manage listings, availability, and pricing.
- Built a secure payment workflow with Stripe, including booking confirmations via email. Designed an admin dashboard for managing users, partners, listings, reviews, and revenue tracking.
- **Tech Stack**
Frontend: React.js, Redux for state management,Tailwind CSS for responsive UI.
Backend: Node.js, Express.js with MongoDB for data storage.
Other Features: Google Maps integration, notifications, user reviews, like/dislike, and help & support mail system.

Findly, Job Search Platform |Github 🏠

- Built a feature-rich job search platform using Next.js and TypeScript, ensuring a type-safe, scalable, and SEO-optimized application.
- Implemented server-side rendering (SSR) to enhance performance and deliver faster page loads for job listings and user profiles.
- Integrated a RESTful API for handling job postings, user authentication, and dynamic data retrieval, improving system efficiency and responsiveness.
- Utilized Socket.IO 🏠 to implement real-time messaging, enabling seamless communication between job seekers and employers.
- Leveraged Redux Toolkit for advanced state management, ensuring smooth navigation and efficient handling of user sessions and job applications.
- Designed a fully responsive UI with Tailwind CSS, providing a seamless experience across devices while maintaining modern accessibility standards.
- Improved search precision by implementing real-time filters and dynamic job categorization, enhancing overall user experience and discoverability.

EDUCATION

Calicut University,

BA English Language And Literature,Ambedkar College of Arts and Science,Wandoor

Nov 2021 – Mar 2024
